Children and Family Network

SM52516

Congressional District: KS-01

FY 99 Funding: \$60,000

Project Period: 9/30/98 - 8/31/01

The goals of this project are to promote systems change and impact policy decisions at the local, State and national levels; to provide parent assistance and support through individual and group advocacy, training, information, parent education, provider education; and to develop and maintain the Keys organization through staff training, board development, fiscal management, and diversity of fund-raising. It will also strengthen its internal and external organizational relationships, foster leadership and management skills for its Board, staff and parents in Kansas. The target population is the families of children and adolescents with serious emotional disorders, agencies served, staff and Board of the Keys for Networking.

Social and Rehabilitation Services

Topeka, KS

Mental Health State Improvement (MHSIP)

SM52886

Congressional District: KS-01

FY 99 Funding: \$100,000

Project Period: 9/1/99 - 8/31/01

The State of Kansas plans an integration and synthesis of information in the data system which will help provide information that will be critical to stakeholder needs. This process will focus on performance measures and there will be broad participation by stakeholders in the process.

School Action Grant

Congressional District: KS-02

FY 99 Funding: \$145,500

Project Period: 9/30/99 - 9/29/00

Topeka, KS

SM52746

The applicant will demonstrate how Wraparound community planning principles can work to stop violence, promote family involvement with schools and community agencies, and train provider organizations to work more closely in positive ways with families, youth and each other. Project will develop a community/management team to: 1) direct, model, support, and evaluate full community implementation of strength-based, family driven, multi-agency, planning, and service coalition; 2) assure quality and measure positive child and family outcomes; and 3) define and disseminate critical elements that develop and sustain family-driven system of care.

Faculty Development Program
Congressional District: KS-03
FY 99 Funding: \$97,984
Project Period: 9/30/98 - 9/29/01

Kansas City, KS
SP08354

This Faculty Development Program is intended to decrease substance use and abuse by promoting substance abuse prevention services by competent professionals at service access points in the community. This will be accomplished by educating faculty fellows in substance abuse prevention. The fellows will function as role models in classrooms and clinical settings while sharing new knowledge and opportunities with other public health faculty, students, clients, and community members.

Office of The Governor
State Incentive Grants
Congressional District: KS-01
FY 99 Funding: \$3,244,800
Project Period: 9/30/97 - 9/29/00

Topeka, KS
SP08113

The State Incentive Grant establishes a partnership between CSAP and Kansas that seeks to reduce substance abuse among youth in the State. This program serves as an incentive for Governor Graves to examine and synchronize the State-wide comprehensive prevention strategy with private and community-based organizations. The project will build a coordinated risk and protective framework to coordinate, redirect and leverage substance abuse prevention resources that are directed toward communities, families, schools and workplaces; develop a state-wide prevention strategy that increases the capacity of Kansas communities to reduce the risk of tobacco, alcohol and other drug abuse among youth; and create a plan to sustain and expand the prevention strategy at the conclusion of the State Incentive Cooperative Agreement.

Targeted Capacity Expansion for Substance Abuse Prevention
and HIV/AIDS

SP08894

Congressional District: KS-04

FY 99 Funding: \$222,612

Project Period: 9/30/99 - 9/29/02

The Risk Reduction Replication Project will reduce risk factors associated with HIV infection among African American youth aged 13-19. The rationale is that if the incidence of substance abuse is lowered in this population and condom use is increased, the rates of HIV will be likely to decrease. This will be accomplished by: changing individual behaviors by conducting skills building sessions that provide youth with an intensive focus on substance abuse, safer sex practices, and HIV prevention.; and influencing the social norms of the African American community by promoting healthy behaviors to African American adolescents through a targeted media campaign. The logic evaluation model will be used to track program implementation and to document how well the objectives of reducing substance abuse and increasing condom use among African Americans is being met.
